

TRACK AGILE COMPANIES / ENTERPRISE AGILITY

We understand that Agile is no longer applied only in development teams. It's applicability has been broadened to areas like finance, legal, marketing, operations, hiring and talent management, and organizational design.

Agile companies is focused on real stories, techniques, and strategies that show the application of Agile and practices across the organization.

The *Enterprise Agility* supports the needs of organizations that embrace the Agile mindset across hundreds, or even thousands of individuals. The speakers understand the complexities of big corporations, such as coordination and synchronization, complex delivery tools, cultural shifts, and massive organizational changes.

This part of the track emphasizes the benefits of adopting enterprise-scale Agile frameworks to consistently deliver impact and value. It will provide insights on patterns, policies, agreements that enable agility at scale.
