

## TRACK AGILE NON-JUST-FOR-IT

We understand the applicability of Agile has been extended beyond the realm of Software Development, and most of the members of the Agile community who are working on projects like this, deserve a space.

This track will provide to those people who are using any flavour of Agile in other domain (Education, Public Administration, ONGs, etc) that is not related to the Software Industry, a voice and share their approach and applicability.

The submissions on this track are meant to plant the seed to encourage people to take on any initiative that has nothing to with IT. Irrespective of the nature of the project, we don't expect very mature projects.

Our Chair:

Carolina Escobar
