

TRACK COACHING, MENTORING, and LEADERSHIP

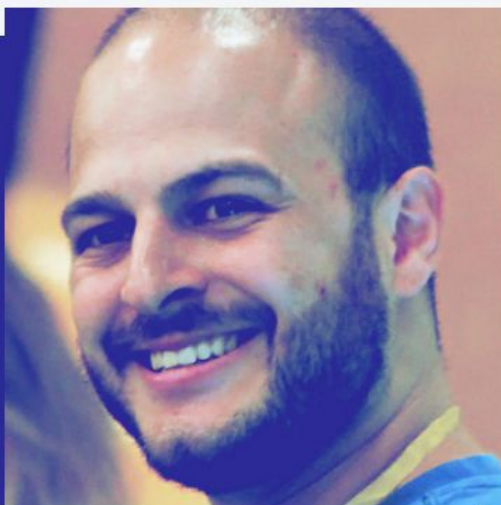

We understand that *Coaches and mentors* play a critical role helping people, teams, and organizations improve themselves and their environment over time.

This track explores coaching and mentoring with an emphasis of developing the skills either as an Agile Coach or Mentor. It also provides you the tools you can use to aid multiple levels across the organization, across different functional domains, and at different stages of an Agile Transformation (helping others to become Coaches or Mentors).

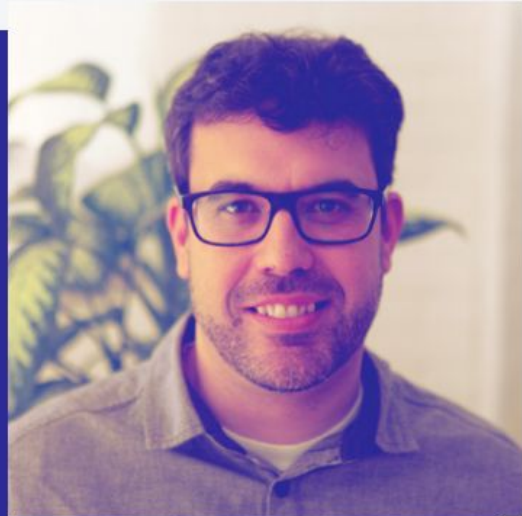

Leadership is about nurture and enhancing. We invite everyone to share experiences, where we can learn and grow, theory, emerging trends, tried-and-tested approaches.

When you attend a session from any who steps into the role of Agile Leader, we hope you will find opportunities to connect with active, current leaders and learn ideas, techniques, approaches you can learn to enhance your own leadership abilities.

Our Chairs:

Florentino Romero Haro

Israel Alcázar
